SUMMARY

Computer Science undergraduate with hands-on experience building full-stack web applications and AI-powered products using the MERN stack, Next.js, Node.js, and modern AI APIs. Built and deployed projects involving data analytics, authentication, AI-generated insights, and real-world web platforms. Seeking Software Engineering, Full-Stack Development, or AI Engineering internship opportunities.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML5, CSS3, SQL

Frontend: React.js, Next.js, Tailwind CSS, Recharts, Framer Motion

Backend: Node.js, Express.js, MERN Stack

Databases: MongoDB, SQL.js, SQLite

AI / Automation: Google Gemini API, CrewAI, AI Automation Workflows

Tools / Security: Git, GitHub, Netlify, Render, Google AI Studio, JWT, Bcrypt, Helmet, CORS

PROJECTS

DataMind — AI-Powered Business Analytics Platform | [GitHub](#)

- Built an AI-powered analytics platform that converts CSV/Excel business data into interactive dashboards and automated insights.
- Developed the frontend using Next.js, React, Tailwind CSS, Recharts, Framer Motion, React Dropzone, and Axios.
- Built the backend using Node.js, Express.js, SQL.js, Multer, JWT, Bcrypt, Helmet, CORS, and Express Rate Limit.
- Integrated Google Gemini 1.5 Flash for automated insight generation with a rule-based fallback engine for reliability.
- Implemented session-based in-memory SQLite storage to make uploaded datasets queryable without persistent storage.
- Deployed the frontend on Netlify and backend on Render; version controlled the project with GitHub.

CampusEats — Campus Food Ordering Platform | [GitHub](#)

- Built a web-based food ordering platform connecting university students and faculty with campus cafeterias, food trucks, and nearby vendors.
- Implemented the application using MongoDB, Express.js, React, and Node.js with a full client-server architecture.
- Designed workflows for food discovery, pre-ordering, and pickup/delivery for a campus-focused ordering experience.

Incredible India — AI-Powered Tourism Platform | [GitHub](#)

- Built a tourism and cultural discovery platform for exploring destinations, historical landmarks, and travel experiences across India.
- Developed a React frontend with Gemini API integration for AI-generated travel recommendations and itinerary planning.
- Rapidly prototyped the application using Google AI Studio and AI-assisted development workflows.

EXPERIENCE

Embrizon Technologies — Intern | Jul 2025 – Sep 2025

- Completed a structured software development internship focused on practical development workflows and real-world project practices.
- Gained exposure to project-based implementation, problem-solving, and software development processes.

IBM SkillsBuild — AI Automation & Intelligent Solutions Intern | Jul 2026

- Worked on AI automation concepts and intelligent solution design through practical problem-solving activities.
- Applied AI/ML fundamentals to explore automation-oriented solutions and intelligent workflows.

EDUCATION

St. Peter's Engineering College — Hyderabad, Telangana | Aug 2024 – Present

B.Tech, Computer Science | **CGPA: 8.73**

CERTIFICATIONS & ACHIEVEMENTS

- Embrizon Technologies — Internship Completion Certificate (Jul 2025 – Sep 2025)
- IBM SkillsBuild — AI Automation & Intelligent Solutions Internship (Completed Jul 2026)

- be10X — AI Tools & ChatGPT Workshop, Completion Certificate
- AI Skills Passport — Completion Certificate
- Participant — GenAI Forge Hackathon
